New Product from Microscan

MS-2 Ultra-Compact CCD Reader

Microscan's user-friendly MS-2 is a fully packaged CCD reader, offering easy integration and several configurations to meet a variety of needs. Advanced CCD technology is coupled with world-class algorithms to ensure easy and accurate decoding of small, damaged or poorly printed codes. High performance and flexibility make the MS-2 the optimal embedded reader for reading difficult codes.

- Scans/second: up to 220
- Read Range: 18mm to 345mm
- Low 5V Power Draw
- IP54 Enclosure
- 4 Standard Versions

ESP version 4.0

Microscan's Easy Setup Program ESP is now available from the Microscan web site.

Microscan's EZ Trax 1.2

EZ Trax allows the user to identify and store symbol images.

Cambridge Conference

Identify Direct is organising a one-day seminar/conference in **Cambridge on Sept 4th 2008**. Morning presentations will include guest speakers from industrial

printing, system integration and Bar Code verification suppliers. The conference will be in the grounds of the historical St John's College. After lunch there will be informal events such as punting, tours of the college and Cambridge. Overnight accommodation is available. Anyone interested should call us.

Identify Direct's Checkrite III System

Checkrite III is a stand-alone, on-line barcode checking system that is used in conjunction with Microscan high performance industrial barcode readers. It is a PLC based system housed in a stainless steel enclosure that handles the logic of monitoring the scanners electrical outputs (Good Match, Good Read, Quality Warning etc.) and provides a visual indicator of the validity of the barcode by way of a 4 colour light stack. On a 'Fail' condition an external output is also available to halt the production line, sound an alarm.

Q-Mode Enhanced Processing Algorithm

- Available for the Quadrus MINI, Quadrus MINI 3, and Quadrus MINI Velocity
- Significantly improves decoding of 1D codes and QR codes
- Greatly enhances depth of field and field of view for all code types
- Adds the ability to decode Micro QR code, Aztec code, and postal codes

Intermec Scan Engines

Identify Direct is the UK official distributor of the Intermec range of scan engines, including the EA15, a 2D reader.

Datamars RFID

We sell the full range of Datamars ISO Compliant High Frequency RFID products.

Code Verification Service

We offer a **Datamatrix** code verification service.

Please see our web site for further details.
